MARKET PROBLEMS

Models built using each organization's historical data:

- High false positives
- Manual review of good merchants
- Long deployments
- Limited perspective on fraud and risk
- Lack of transparency/explainability
- Reliance on transaction risk scores

BRIGHTERION SOLUTION

Market-ready models pre-trained on Mastercard's global network intelligence

- Accurate risk scores and fewer false positives
- Efficient workflows
- Production-ready for a light lift
- Predict probability of loss
- Transparency
- ROI from day 1

Merchant Monitoring: a proven solution optimized specifically for merchant risk management

DEPLOYMENT OPTIONS

01

Merchant Monitoring-as-a-Service

- There's no need to build a payments flow with this zero integration solution
- Simply supply Brighterion with a list of merchant accounts
- Scores for all Mastercard transactions are just a click away in Tableau

02

Full integration in three easy steps

- Integrate data flow via API
- Send data to initialize model
- Brighterion returns risk scores via API

Optional modules that allow customizable thresholds

Rules Management module

- Create and edit rules
- Profile transactions
- Test effectiveness of rules on data

Case Management module

- Manage users, groups and roles
- Generate management reports
- Audit and trace activities

Business Insights module

- Customize reports/KPIs
- Leverage standardized reporting
- View three spending dimensions: overall, by channel and by transaction type

BENEFITS

Actionable insights to empower fraud analysts & transform business strategy

HIGHER REVENUE

- Retain revenue formerly lost to fraud
- Gain insights into your best – and most risky – merchants

EASY DEPLOYMENT

- Two easy options to suit your organization:
- Merchant Monitoring-as-a-Service
 - Fully integrate: on-premise or through our cloud based API

BROAD FRAUD RISK IDENTIFICATION

- Identify more fraud vectors than with transactions geared to transaction-level fraud
- Benefit from Mastercard's global network intelligence and industry experience

CREATE EFFICIENCIES

- Improve productivity and operational efficiency
- Reduce time wasted on unnecessary manual review
- Customize risk/approval thresholds
